"Recensione ?Aesthetic Septorhinoplasty is a comprehensive, technically oriented rhinoplasty textbook for surgeons who perform endonasal septorhinoplasty. It is designed to be relevant to all levels of surgeon including residents through senior surgeons performing many rhinoplasties a year. Interestingly, it presents many new concepts related to endonasal (closed) rhinoplasty. ? Aesthetic Septorhinoplasty is a book worth reading and having nearby when planning endonasal rhinoplasty operations. ? I highly recommend this book for all levels of rhinoplasty surgeon.? (Dr. Jay Calvert, Aesthetic Surgery Journal, Vol. 37 (1), January, 2017)?This book depicts a closed approach to nasal surgery using a patient-specific operative plan. ? The book is a combination of thoughts, ruminations, illustrations, drawings, and techniques for reshaping the outer and inner nose. ? Each photo is accompanied by a brief written description to fully articulate his operative techniques. ? The author's personal techniques are unique, innovative, and thought-provoking. Aesthetic rhinoplasty surgeons will have much to learn and consider after reading this book.? (Jeffrey S. Rosenthal, Doody's Book Reviews, May, 2016) Dalla quarta di copertina This superbly illustrated book describes how techniques previously developed by Dr. Rollin Daniel for use in open rhinoplasty can be adapted for use in the closed approach. It is the author?s opinion that this combination offers greater feedback during surgery, a shorter recovery period, and absence of scar. Full explanation is provided of preoperative preparation, including evaluation of the nasal surface aesthetics using the concept of geometric polygons as aesthetic subunits to define both the existing deformity and the aesthetic goals. The surgical techniques developed and modified to achieve the desired surface appearance are then described step by step with the aid of a wealth of color photos. It is illustrated how the novel dissection and redrape control methods reduce the healing time and enhance outcome, and an extensive series of case analyses is presented to document the benefits of the approach. The book is written in a ?cookbook format? that will enable plastic surgeons quickly to learn how to utilize the closed approach to rhinoplasty to optimal aesthetic benefit. L'autore Baris Çakir graduated in medicine from Çukurova University, Turkey and joined Kartal Training and Research Hospital as a Plastic Reconstructive and Aesthetic Surgery resident in 1999. He subsequently continued his work on microsurgery, performing over 500 microsurgical operations during training. He became a Plastic Surgery specialist in December 2004, and developed an interest in sculpture and art history with the aim of achieving more successful results in plastic surgery. He studied Fine Art Sculpture at Suleyman Demirel University and continued this education in the Fine Arts and Sculpture at Inonu

University, Malatya. He worked with Michael Esson regarding model and pattern studies. Dr. akir worked at Istanbul Memorial Hospital between 2007 and 2010, when he entered practice as a private surgeon in his office at Fulya Terrace, Istanbul. Rhinoplasty accounts for almost 90% of his surgical practice."
